PROFESSIONAL SUMMARY

Computer Science graduate from Andhra University with a foundation in computer applications and an interest in full-stack web development and AI/ML. Currently building practical skills in HTML, CSS, JavaScript, React.js, Python basics, databases, API integration, and AI chatbot applications. Interested in developing responsive, user-friendly web applications and technology solutions, and seeking an opportunity to apply technical knowledge, learn from experienced teams, and contribute to organizational goals.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6), React.js, Bootstrap, Material UI, Responsive UI/UX Design
Backend	Node.js, Express.js
Programming & Data	Python Basics, NumPy, Pandas, API Calling & Integration, GraphQL Fundamentals
Databases	MongoDB, Supabase, MySQL
AI & Machine Learning	Machine Learning & Deep Learning Basics, Large Language Models (LLMs), Ollama Basics, Hugging Face, AI Chatbot Applications, Retrieval-Augmented Generation (RAG)
Tools & Deployment	Git, GitHub, VS Code, Postman, Netlify, Vercel, Render
Professional Skills	Data Management & Analysis, Report Writing & Documentation, Communication & Team Collaboration, Project Coordination

PROFESSIONAL TRAINING

Full Stack Development & AI/ML — AAROHAN

- Built skills in HTML5, CSS3, JavaScript, React.js, and responsive web development.
- Learned Python basics, database concepts, API integration, and foundational Machine Learning and Deep Learning.
- Explored LLMs, AI chatbot applications, and application deployment.

WORK EXPERIENCE

Junior Technician | Tata Electronics Products and Solutions, Tamil Nadu

2 years of experience

- Worked as a Junior Technician in an electronics products and solutions environment.
- Supported day-to-day technical and operational activities as part of the team.
- Applied a responsible work ethic, adaptability, and team collaboration in completing assigned tasks.

PROJECTS

1. TribalHerb — Tribal Medicinal Plants Information Website

- Designed a concept for a website to present medicinal plant information and tribal herbal products relevant to Araku, Chintapalli, and Paderu.
- Planned plant search, plant information cards, regional content, and a responsive green-themed interface.
- Repository link: https://github.com/Dharanik-28/tribal_herb_proj

2. AI-Based Food Image Classification System (Project Concept)

- Planned a web application focused on Indian food images, with a simple registration interface and food prediction as the main feature.
- Proposed technologies: React.js, JavaScript, HTML, CSS, and machine-learning integration.
- Repository link: https://github.com/Dharanik-28/indian-bites

3. Responsive Website Development

- Practiced creating web pages using HTML, CSS, and JavaScript, including layout styling, forms, search interfaces, and responsive design.
